BIOGRAPHY
I am a Project Designer at HOK, as well as the first ever global Chair of Social Responsibility. I believe that good design has strong ties to the community in which it is built and should address local social, economic and environmental concerns. In 2010 I co-founded HOK IMPACT, our firm-wide approach to Corporate Social Responsibility (CSR). As the Director of HOK IMPACT, I am working closely with five leadership to strengthen our CSR policies and create a central database for information related to the community-based work we do as a firm. However, what motivates me the most right now is setting a positive example for my two year old son, George.

AWARDS
- BD+C 40 Under 40 2013
- Generation Now, St. Louis Magazine 2013
- Next American Vanguard, Next American City Conference 2012

- The American Institute of Architects Practice Management: Knowledge Center
- Metropolis Magazine Blog - Point of View, October 31, 2013, "Renew our Faith", Metropolis Magazine

WILLIAM JEFFERSON CLINTON CHILDREN’S CENTER
CORE MEMBER OF DESIGN TEAM
2011-2012

The William Jefferson Clinton Orphanage and Children’s Center, a collaboration between the USGBC and HOK to rebuild a Port au Prince orphanage and children’s center damaged by the January 2010 earthquake, seeks to bring super-sustainable design to people in the developing world. The obstacles in designing this project are many and include an unreliable power grid, a contaminated water source, a limited network of infrastructure and the current lack of governmental organizations to address these issues.

To create safe, reliable access to basic utilities, the design provides resources such as a rain-catch water system and off-grid electricity. The team’s focus on sustainability has played a major role in successfully addressing many of the issues the situation has presented. By working closely with the clients, this project provides a refuge for the most vulnerable people in the Haitian community—children overcome by starvation, dehydration and disease. In addition to serving as a safe haven for Haitian children and their families, this project is aiming for LEED Platinum certification.
