Pope John Paul II Hall
Location: Rejika, Croatia

Architect: Randić & Turato / Saša Randić and Idis Turato

Owner: Franciscan monastery Trsat

Year of completion: 2008

Climate: Humid Subtropical

Material of interest: Terracotta Brick

Application: Exterior

Properties of material: The brick is not fully flush in portions of the exterior allowing light to pass between bricks and create an effect that the brick is being stretched apart in places. Color goes well with existing construction at the monastery and imitates a simple hip roofed barn.
