Concrete House

Location: 6 Clermont Terrace, Kelburn Wellington, New Zealand

Architect: Simon Twose
Owner: Brett Mainey
Year of completion: 2011
Climate: Marine West Coast Climate
Material of interest: Concrete
Application: Exterior

Properties of material: These concrete screens are arranged in various dynamic ways; leaning, elevated or floating and form the outer carapace to the house. Within this, courtyards are separated off by glass, which threads between the concrete screens. This brings the house in active and equivalent relationship with the landscape.
