Common fixed point results for multi-valued mappings  
with some examples

Abstract

In this work, we introduce the (CLR)-property for the hybrid pairs  
of single-valued and multi-valued mappings and give some coincidence  
and common fixed point theorems for the hybrid pairs of some con-  
tractive conditions. Also, we will give some examples to illustrate  
the main results in this paper. Our results extend and improve some  
results given by some authors
