

Design Miami Temporary Structure

case study
By Ly Mai

Location: Miami, FL

Architect: Aranda\Lasch

Owner: Design Miami

Year of completion: 2008

Climate: Tropical Monsoon Climate

Material of interest: opaque vinyl fabric

Application: Exterior finish held up by slender aluminum poles

Properties of material: Vinyl coated woven polyester mesh fabric; delivers exceptional durability under intense wind and weather conditions. Helps to regulate the thermal effect. Provides privacy and comfort without obstructing the view.

Manufacturer/ fabricator:
manufacturer: EventStar Production
