

National Parc Hohe Tauern Mittersill

case study
By Margina Demmer

Location: Salzburg, Austria

Architect: Forsthuber & Scheithauer Salzburg

Owner: N/A

Year of completion: 2007

Climate: Marine West Coast Climate

Material of interest: FibreC

Application: Exterior/Interior

Properties of material: FibreC, which is also known as "concrete skin" - is a concrete panel reinforced with glass fibers which combines the advantages of concrete and glass fibers in one product: it is as solid, moldable and durable as concrete, but thanks to the glass fibers also thin-walled, fireproof and light-weight.

Material used: fibreC Facade 13 mm
