

Brick Pattern House

case study
By Cameron McRae

Location: Tehran, Iran

Architect: Alireza Mashhadmirza

Owner: N/A

Year of completion: 2011

Climate: Semiarid

Material of interest: Brick

Application: Exterior

Properties of material: Brick is laid in a simple manner that allows the owner to have privacy without having curtains or allowing a view to the interior. Brick laying method was simple enough for the owner and other low wage workers to do the work themselves. No outside contractor was used for the construction of the exterior skin.
