

Yalova Cultural Center

case study
By Cameron McRae

Location: Yalova, Turkey

Architect: Emre Arolat Architects

Owner: Akkok Grubu

Year of completion: 2010

Climate: Mediterranean/Humid Subtropical Climate

Material of interest: Cor-ten

Application: Exterior

Properties of material: Material has the natural look of oxidized metal and has a unique rust color that adds an appreciated aesthetic appearance. Additionally, as the material is already oxidized, it has no change in visual appearance as the material ages.
