

# La Tallera

case study  
By Ali Ward

Location: Morelos, Mexico

**Architect:** Frida Escobedo

**Owner:** NA

**Year of completion:** 2010

**Climate:** Koppen Climate Aw

**Material of interest:** Concrete

**Application:** Exterior

**Properties of material:** Using concrete as a screen, giving it a light appearance despite concrete's typical, solid, heavy structure. The concrete screen acts as a passive cooling strategy, allowing air to flow into the building while providing shade and natural light into the building.
