

Messe Basel New Hall

case study
By Ziwen Wang

Location: Basel, Switzerland

Architect: Herzog & de Meuron

Owner: MCH Swiss Exhibition (Basel) Ltd

Year of completion: 2013

Climate: Oceanic climate

Material of interest: Metal

Application: Exterior/ Skin

Properties of material:

Homogeneous material (aluminum) is the over all exterior surfaces. The facade of articulated twisting bands strategically modulates and reduces the scale of the large exhibition volumes to its surroundings.
