

# Nocenco Cafe

case study  
By Zhuoying Chen

Location: Vinh, Nghe An, Vietna

**Architect:** Vo Trong Nghia Architects

**Owner:** N/A

**Year of completion:** 2018

**Climate:** Am (Tropical Monsoon Climate)

**Material of interest:** Bamboo

**Application:** Roof, interior

**Properties of material:**

- High compressive strength
- Light weight, less labor cost
- Possible to install the bamboo structure without any additional structural support
- Elasticity, widely preferred in earthquake prone regions
- Flexible in shapes
