

Plassen Cultural Center

case study
By Larissa Sattler

Location: Molde, Norway

Architect: 3XN

Owner: N/A

Year of completion: 2012

Climate: Continental Subarctic

Material of interest: Gray granite masonry slab

Application: Exterior

Properties of material: This material was able to be used on the exterior walls as well as the roof to protect the whole building and allow the roof to be accessible to the public space.
