Salvaged Ring

Vietnam

Architect: a21studio
Owner: N/A
Year of completion: 2014
Climate: Humid Subtropical Climate
Material of interest: reclaimed wood
Application: Exterior

Properties of material: The project, entitled ‘salvaged ring’, takes its name from the large quantity of scrap wood used in the building’s construction. The timber, which was sourced in a range of shapes and sizes, have been adapted to suit new functions. Smaller pieces are utilized as louvers, while the main structure is formed from the larger sections – connected by traditional mortise and tenon techniques.
