

Kanagawa Institute of Technology Workshop

case study
By Shijing Zhu

Location: Tokyo, Japan

Architect: Junya Ishigami + Associates

Owner: Kanagawa Institute of Technology

Year of completion: 2008

Climate: Humid subtropical climate

Material of interest: Glass

Application: Exterior

Properties of material: The studio is about the closest you can get to the feeling of working outside while being indoors. The floor-to-ceiling glass makes the building appear weightless and elegant, and the open plan preserves the building's sense of transparency as the viewer's eye can shoot directly across the uninterrupted space.
