Architect: rimpf ARCHITEKTUR
Owner: N/A
Year of completion: 2017
Climate: Temperate oceanic climate
Material of interest: ETFE-foil (fluorine-based plastic)
Application: Exterior and interior
Properties of material: The structure and color of the translucent shell, made of ETFE-foil, symbolize nature and life. The exceptional significance and the identity-establishing shape contribute to the character of this entrance building as an unique location.
