

Exion Office Building

case study
By Shijing Zhu

Location: Krung Thep Maha Nakhon, Thailand

Architect: I Like Design Studio

Owner: N/A

Year of completion: 2014

Climate: Tropical wet and dry

Material of interest: Concrete

Application: Exterior

Properties of material: The west and east walls of the building have been designed as solid concrete to block heat from entering the building. On the other side, the northern and southern walls have no concern overheat, and therefore have been designed using glass façade to maximize the views.
