

# Church in Urubo

case study  
By Larissa Sattler

Location: Urubo, Bolivia

**Architect:** Jae Cha

**Owner:** N/A

**Year of completion:** 2000

**Climate:** Cold Semi-Arid Climate

**Material of interest:** Recycled Beer Crates, Recycled Facade

**Application:** Exterior

**Properties of material:** The simplicity of the materials created a highly flexible space that blended traditional wood with inexpensive, yet modern polycarbonate plastic panels. Additionally, the polycarbonate plastic panels create an interplay of light and shadows when the light strikes it.
