

Metal Shutter Houses

case study
By Yu Yan

Location: 524 W 19th St, New York, NY 10011, USA

Architect: iShigeru Ban Architects + Dean Maltz Architect

Owner: HEEA Development LLC

Year of completion: 2011

Climate: cfa

Material of interest: Metal

Application: Structure

Properties of material: The Metal Shutter Houses is a dynamic building. The facade's motorized perforated metal shutters serve as a light-modulating privacy screen at the outer edge of each residence's terrace adjacent to the double-height living rooms.
