

Gallery of Furniture

case study
By Rui Guo

Location: Brno-Vinohrady, Czech Republic

Architect: CHYBIK+KRISTOF

Owner: the MY DVA group

Year of completion: 2016

Climate: humid continental climate (Dfb)

Material of interest: Recycled plastic seats, reuse existing structure

Application: facade, structure

Properties of material: The Project turned the old car showroom into a furniture gallery. To accomplishing the construction fast and cheap, the design uses around 900 black seats. The material of the seats for the facade can resist different weather and UV light. The facade is easy to repair if damaged and to clean with high-pressure water once or twice a year. It is also an iconic symbol for the clients who are focusing on furniture.
