Société Privée de Gérance

Location: Route de Chêne, Swiss

Architect: Giovanni Vaccarini Architetti
Owner: the Swiss Société Privée de Gérance
Year of completion: 2017
Climate: Oceanic climate (Cfb)
Material of interest: glass panel shading, view amplify, glass fins
Application: facade
Properties of material: The facade is created by massive repeating the same glass panel with different density. The facade provides shading but maximum the visibility from inside. The view from the interior is amplified, reflected and altered by the facade while from outside the building appears as a volume of the glass material.
