Barb - Thanks for confirming.

Andrew - Please let me know when the revised version has been published on Open Scholarship.

Thanks to you both!
-Andrew

Andrew,

Please see Prof. Meacham's response below, and thanks for submitting Andrew's revised version to Open Scholarship.

Thanks,
Barb

Yes. The modifications did not correct or change any data analysis. The vast majority of the corrections were to fix references to equations in the text. Apparently, Andrew did not use an equation number tracker so when he added an equation he only updated the numbers but not the references to the numbers in the text. There were also a couple of minor figure corrections where incorrect axes limits were used.

Thank you,
Mark

Hi Mark,

Are you okay with Andrew Ledbetter submitting the attached thesis to replace his original submission to

Open Scholarship? Please see email exchange below. I dropped the ball on this last week, so if you could let me know as soon as possible I'd appreciate it. Did he talk to you about the changes he made?

Thanks,
Barb

Yes. I agree we should have a policy. Would you please draft something up for us to discuss and then we can run it by the graduate board for approval?

I'm inclined to allow Andrew to do this, given that it is so soon, but i agree with your inclination to bring his faculty advisors in to the discussion. WOULD you please check in with one or both of them? If they are ok with it then let's let Andrew do this, and get a policy in place for next time.

thanks much,
Trevor

Hi Trevor,

I'm not sure if you want to give your approval on this or if I should ask Dave Peters and Mark Meacham in the MEMS department (or maybe Cathy Freesmeier). Andrew Ledbetter sent me the attached email about making minor revisions to his final thesis. He has already submitted the revised hard copy versions to me, but the Library copied me on their response to Andrew's request to replace his already posted online thesis. I don't see any problem with posting the corrected version, but I don't know if we have an official policy about this. It might be a good idea to have one, though, since we wouldn't want students to come back months or years later and ask for corrections to be submitted.

For this case, do you approve the Library posting Andrew's corrected version of his thesis?

Thanks,
Barb

Hi Andrew

Thank you for your message and I understand your request. Because this work as accepted represents the work done to receive your degree, I think the question of posing corrected versions is a policy question that needs to be addressed by the engineering school. So I have passed it along to them, and if that is acceptable to them, I will make the corrected version you've sent the publicly-accessible version, while retaining the original for purposes of the academic record. We'll let you know when we have a decision from the engineering school.

Best,

Andrew

Subject: M.S. Thesis Resubmission request

Hello,

I submitted my master's thesis on 1/2/18 to the Engineering and Applied Science Theses and Dissertations (https://openscholarship.wustl.edu/eng_etds/270). Since submitting the document, I found many errors that needed to be corrected.

I would really like to resubmit a corrected version of the document to OpenScholarship. I have attached the corrected version to this email. I was told the person who manages the collection is currently out of the office, but that someone else is managing ETDS and would be able to handle this request.

Please let me know if you need any other information from me, or if something has changed and

resubmitting the document is no longer a possibility. Otherwise, please confirm that this message has been received. I'm not 100% positive I'm sending it to the correct email address. :)

Thanks you!
Andrew Ledbetter
