SHIFITNG SCALES | RENAISSANCE OF A PARK SYSTEM
PARKS COMPREHENSIVE PLANNER, URBAN DESIGNER & PROJECT MANAGER
2011-2014

With a population of 42,000, Burlington Vermont’s system of parks, trails, and open/recreation spaces serve myriad roles for the city: social, recreational, economical, and ecological. The system is comprised of 37 parks on 520 acres. A focal plan: A comprehensive, community-driven park system plan focused on 7 system themes: People, Wellness, Connection, Stewardship, Community, Service, & Impact. The plan was done in conjunction with department rebranding and wayfinding design. BTV Alm Art! The rehabilitation of an 8-mile multi-use path that runs along the Lake Champlain waterfront. The path is the spine of Burlington’s sustainable transportation network. Focus! Jen is a leader through the BTV Bike Path rehab. Three prototypes (rest stops, information stops & mini parks) were formalized to increase engagement along the waterfront & connect the community to adjacent amenities. (I’ve got ya!) Prompted by a community request to explore traffic calming, the permanent street closure set the stage to reclaim recreation space in the City’s Old North End. The installation features a street mural, plantings, boulders, moveable furniture, and sometimes dancing.

BIOGRAPHY
Jen Francis is a planner, architectural/urban designer and artist practicing in Vermont. She received a Bachelor of Science in Architecture and became a schooner builder of the S/V Denis Sullivan, Wisconsin’s flagship. Post boat, architectural design work took her to Switzerland, followed by graduate studies in St. Louis, Argentina and New York City. While in St. Louis, Jen found love of master planning and bird migration, anchored by her work on the design/construction of the Audubon Center at Riverlands. Jen leans heavily into the planning side of life, serving as the Parks Planner for the City of Burlington. Making (anything) continues to be an essential tool for reveling & revealing.
